

# WOW!!...Seagull Does it Again!

Godin Guitars releases a *limited edition* acoustic package under its Seagull brand at an incredible value.

For immediate release:

*Montreal, Canada-May 9th, 2006-* Canadian based Seagull guitars, known in part for the award winning S6 Original as being one of the greatest values available in the acoustic guitar world, once again pushes the envelope with unparalleled sound and quality at an unbelievable price. This time around... it's with the Seagull Entourage Package.

The Seagull Entourage Package offers two models based upon the S6 Original Slim and the Mini Jumbo. Both feature beautiful new "plumage" in the form of a new Rustic Burst, custom polished finish. This finish not only protects the guitar but never impedes the sound of the instrument allowing it to age properly and sound better the more it's played overtime. Along with the new Integrated Set Neck system, for increased stability while reducing warping and twisting due to climate changes, the Entourage guitars also feature Select Pressure Tested Solid Tops. Testing the tops in this way ensures the highest levels of stiffness and rigidity along with optimal harmonic vibration. Other features include a Seagull Slim Neck with a 1.72" nut, great for players more accustomed to a traditional nut width, a new arched rosette adding structural integrity to the area around the sound-hole, along with cream double binding, Tusq nut and fully compensated saddle to complete the finishing touches.

Did we mention the new Seagull Acoustic gig bag (now sold seperately) for these guitars and the rest of the Seagull line? "Double Stuffed" padding interior along with durable carrying straps and convenient storage compartments make this a fantastic addition to the Seagull Entourage guitars.

Undeniable sound and craftsmanship nesting in an optional, protective, padded and portable new acoustic gig bag. All this starting at an unbelievable price!!

The Seagull Entourage guitars....need we say more.
